from recent IBTA-sponsored Plugfest

## The InfiniBand Trade Association (IBTA) Integrators' List

The IBTA Integrators' List is a compilation of all products that have been tested and accepted by the IBTA as being compliant with the InfiniBand architecture specification. New products are added every spring and fall following IBTA-sponsored Plugfest events. Vendors with products on the list receive access to a special marketing program and logos which may be used in promotional materials and affixed to their cables and devices.

The Integrators' List is designed to support data center managers, CIOs and other IT professionals with their planned deployment of InfiniBand solutions. The Integrators' List was started in 2003 and currently contains several hundred InfiniBand-compliant products.

For more information on the IBTA Integrators' List and to view the latest version, please visit [www.infinibandta.org/integratorslist](http://www.infinibandta.org/integratorslist)

*"Cinch Connectors' participation in the IBTA Plugfests provides valuable feedback and validation from a third party that our cables are meeting or exceeding the requirements of an InfiniBand link. Further, data obtained by the Compliance and Interoperability Working Group is used to drive continuous improvement to both the InfiniBand specification, as well as validation methods. Cinch is proud to add the IBTA Certified logo to all of our cables that successfully pass the rigorous testing required for the IBTA Integrators' List."*

Jim McGrath  
Cinch Connectors

*"Participation in the IBTA Plugfests has been an extremely beneficial experience for us as an active copper cable manufacturer. It has provided us with crucial information about the performance of systems interconnected with our cables, and there is no better opportunity to interact with so many different industry players under one roof. Being on the IBTA Integrators' List gives us valuable exposure to potential cable customers, while providing the customer with confidence in the performance of our active cable interconnect."*

Gourgen Oganessyan  
Staff Product Marketing Engineer  
Intersil Corporation

*"Early interoperability and compliance testing is key to enabling faster adoption of new products to the market. The IBTA compliance package is one of the most impressive in the industry and Mellanox is committed to ongoing improvements to ensure quality InfiniBand products are present on the list."*

Amit Krig  
Director of Solution and Validation  
Mellanox Technologies

*"QLogic is a strong supporter of the IBTA and the open InfiniBand (IB) standards, and we believe that the Plugfest and the resulting Integrators' List are important components in driving InfiniBand as a key open-standard interconnect. The IBTA Integrators' List is a valuable resource to customers who want to make sure that they buy only IBTA-compliant hardware to maintain interoperability and investment protection. We were pleased to have both QLogic switches and HCAs in the last Plugfest."*

Kevin Judd  
Senior Staff Product Manager  
Network Solutions Group  
QLogic

*"The IBTA Plugfest is a great event for up-and-coming companies who are trying to build their high-speed product portfolio and break into a new market segment. The Plugfest provides InfiniBand vendors with an opportunity to show their capabilities and performance against the industry specification. Getting products listed on the IBTA Integrators' List helps break through the door at the customer end. In many cases, having products listed on the IBTA Integrators' List is a customer prerequisite; it saves the end user time, resources and money as they consider new deployments."*

Atul Sharma  
Director, Product Development  
High Speed Products  
Volex

*"Voltaire has participated in IBTA Plugfests since the program's inception to test and confirm compliance and interoperability of our InfiniBand platforms. This is a valuable venue for us to interact with partners at a technical level and help ensure the development of end-to-end InfiniBand fabric solutions that enable data center managers, CIOs and other IT professionals to deploy our solutions with the utmost confidence."*

Asaf Somekh  
Vice President, Marketing  
Voltaire
